iDentaire

We offer you the best price on all your ordered products.

We are not official dealer for some manufacturers like 3M, Kerr, etc. But we offer the same warranty offered by the manufacturer on the products we supply.

iDentaire

Nous vous offrons le meilleur prix sur tous les produits commandés

Nous ne sommes pas un fournisseur autorisé pour quelques manufacturiers comme 3M ou Kerr, etc. Mais nous vous offrons la même garantie offerte par les manufacturiers sur leur produits.

PREMIUM CARBIDE BURS • MADE IN CANADA

- Precision ground cutting edges for consistent cutting performance.

SOLID CARBIDE ONE - PIECE CONSTRUCTION • MADE IN USA

- Eliminates joint breakage
- A highly concentric bur results in a faster, smoother and more precise cut.

All Crosstech Diamond Burs are Excellent for Cutting Zirconia in Crown Removal

- Use as much water spray as possible without impeding visibility.
- Use caution in the amount of pressure applied when cutting the zirconia to avoid damaging the underlying tooth structure
- Use a new diamond to make a clean cut on the buccal surface extending onto the occlusal or incisal surface.
- Use a crown removing instrument such as a crown spreader to fracture the crown and/or break the cement layer.

LANCER INSTRUMENTS

Lancer instruments are crafted from surgical stainless steel. Their screw joint design allows for easy tip alignment and adjustments. These instruments are hand-buffed to a smooth, mirror luster for corrosion resistance and are designed to repeatedly withstand all accepted methods of sterilization without losing their aesthetic qualities. Lancer instruments are available in a wide variety of the most popular designs and configurations.

STEALTH™ INSTRUMENTS

Constructed from the highest grade surgical stainless steel and the most modern, corrosion resistant materials available, Stealth instruments are designed to withstand all approved sterilization procedures. Each Stealth instrument is hand-buffed and finished by true craftsmen to ensure the finest quality and performance. Stealth's uniquely effective designs dramatically increase stability without sacrificing range of motion, enhancing control while reducing required force. Tips and cutting edges are manufactured from hardened steel or tungsten carbide for increased durability and better cutting performance over a longer period of time.
